Resolution concerning the war in Ukraine (as amended at the National Committee meeting of January 28 and 29, 2003)

Whereas the war in Ukraine which has been going on for over 6 months has killed thousands of people and uprooted and displaced many more,

Whereas this war which has destroyed cities and cultural monuments, is exacerbating the environmental (climate) crisis, is fueling a global energy and food crisis and has the potential of precipitating a nuclear disaster,

Whereas the roots of this war in Ukraine today are complex and go back many years and will not be settled militarily,

Be it resolved that to prevent further death and destruction in Ukraine, the AUUC calls on the Canadian government to actively push for a comprehensive cease fire in the region and a negotiated peace settlement between Ukraine and Russia,

Be it further resolved that Canada strives for disarmament in Europe and all over the world,

Be it further resolved that the AUUC calls on the Canadian government to:

- a) call on NATO and its Western allies to cease its expansion in Europe
- b) help secure the withdrawal of Russian troops from Ukraine
- c) support Ukraine's commitment to international neutrality (and a binding referendum on the future of the Donbas region)
- d) commit to renewed diplomacy with Russia

Adopted by the National Committee of the Association of the United Ukrainian Canadians September 9, 2023
